
Anna will share the evolution of mass timber from a Lendlease perspective and the future direction of utilising digital design and manufacturing principles such as Design for Manufacture and Assembly and LEAN to create positive disruption.

BIO: Anna is a qualified Industrial Designer and Project Manager with Lendlease DesignMake business which focuses on applying advanced design, manufacturing and assembly principles to the mass timber built form. Anna has first hand experience in leading the design, procurement and local processing of CLT panels and brings a deep understanding of establishing best practice design to maximise material efficiency and ease of assembly on site.
