

2014 Dean's Award for Outstanding Research Higher Degree Theses

I am pleased to confirm that three PhD graduates in Civil Engineering have been awarded the 2014 Dean's Award for Outstanding Research Higher Degree Theses.

The successful awardees are:

Dr Hang Wang for his thesis on "Turbulence and air entrainment in hydraulic jumps"

Dr Vui Cao Van for his thesis on "Seismic damage assessment and FRP retrofit of reinforced concrete structures"

Dr Abolfazl Eslami Hassanabadi for his thesis on "Investigating the earthquake performance of FRP strengthened reinforced concrete structures"

RHD candidates are nominated by their thesis examiners for this award, with less than 10% of graduates being recognized this way each year. Please help us to congratulate our graduates on an excellent achievement.
